

## Supporting Our Customers | Breaking the Status Quo

---

Applied Engineering is different because “we fit” your company. Not only do we make this claim, but we have the experience and portfolio to back it up.

### Customer Profile

In 2017, Trex, the world’s number one decking and railing brand, acquired Staging Concepts, an industry leader in portable staging equipment since 1990. Having supplied railing for some of the largest projects in the country, their wealth of experience provides them with the tools and knowledge necessary to provide both exceptional customer service and unrivaled results.

### Project

Trex utilizes Applied Engineering for software and services. For software, our **technology** team provides Trex with CAD and technical support of their software that includes Autodesk Product Design Collection for manufacturing.

Recently, Trex’s sales were outpacing their design capacity, but they didn’t want to hire new permanent staff for a temporary project. Applied’s engineering **services** team filled the capacity gap to allowing the projects to finish on time.

### How We’re Different

Applied Engineering puts the power in your hands and offers the flexibility to be able to help whenever, with whatever, and for however long you need.

Applied Engineering is the only firm with the talent and technology to fit your project, your process, and your culture.
